W1200D Specifications

Appliances are pre-wired and plumbed

- 78L fridge freezer installed. 20L Microwave and Dishwasher pre-fitted and repackaged for transport. Cooktop, Rangehood, Splashback and Lighting installed.
- Cooktop requires connection to isolation switch on site by a registered electrician.
- 4 x Double power outlets, Isolation switch, 3 x 20Amp circuits and junction box all pre-wired.
- Refer to electrical diagram and discuss your general power requirements with your registered electrician.
- Sink and mixer tap with waste, dishwasher discharge and P Trap installed.
- Refer to the plumbing diagram and discuss your incoming water and waste water requirements with your registered plumber.

Fully or partially assembled

- Can be delivered fully assembled to a ground floor location, providing you have the right access. Can also be delivered partially assembled with instructions. Check access to final location.
- Assembly on site will typically require two people, screwdrivers and driver bit (no.2 pozi drive & no.2 square drive, supplied). A screwgun is recommended. Neutral cure silicone to seal the benchtop and splash back internal corners.

Kitchenettes are fitted with our unique integrated power board. All outlets are pre-wired and come with an electrical declaration of conformity. Two 20A circuits are installed in all units plus a third 20A circuit with isolation switch for models with a cooktop. Discuss your general power requirements with a registered Electrician, they will need to issue a certificate of compliance for the incoming power connection.
